

How much do solar panels cost in Washington?

Solar panels will save you a lot of money over time, but the upfront costs aren't cheap. The average Washington homeowner needs a 12.55 kW solar panel system to cover their electricity needs, which comes out to \$33,923 before incentives. Prices range from \$28,835 to \$39,011, but after the federal tax credit, that drops by 30%.

How much does a 5 kW solar system cost in Washington?

The Residential Clean Energy Credit, formerly known as the federal investment tax credit (ITC), can reduce your solar panel system's cost by 30%. Your entire system qualifies for this incentive, including equipment, labor, permitting, and sales tax. The average cost for a 5 kW solar panel system is around \$13,601 in Washington.

Is Washington State a good state for solar energy?

Washington State is now a superstar in the world of renewable energy. Thanks to its Renewable Portfolio Standard goals that incentivize the use of industrial, commercial, and residential solar power, it has become incredibly accommodating to solar energy production.

Should you switch to solar energy in Washington State?

Switching to solar energy in Washington State may come with several benefits, including tax breaks. Plus, it's more eco-friendly. Here's everything you need to know. Instantly estimate your solar cost and savings. Harnessing the energy of the sun to power your home is a great way to cut down on your eco-footprint.

Does Washington have a solar rebate program?

Washington's one other big solar rebate is known as the Renewable Energy System Incentive Program. While RESIP is still an active program, it reached full capacity in 2021 and is no longer taking on new customers. The Washington State Legislature would need to authorize additional funding for the program to open up again.

Should you buy a new solar energy system in Washington State?

With solar power, you can generate large amounts of electricity and save yourself thousands of dollars per year in utility bills. There has never been a better time to buy a new solar energy system in Washington State.
