

Do solar panels need a warranty?

With no moving parts, solar panels may never need maintenance or repairs for the entire time you own them, which allows manufacturers and installers to confidently offer long warranties. There are three primary warranties for your solar system: performance warranties, equipment warranties, and workmanship warranties.

What types of warranties cover solar panels?

There are two basic types of warranties that cover solar panels. A product warranty protects you from defects in a solar panel stemming from material quality or manufacturing errors. This is also referred to as an equipment or materials warranty

How do I get a solar panel warranty?

Generally, the most robust warranties are obtained by hiring installation companies certified by the solar brands they represent. Alternatively, long warranties can also be secured from solar manufacturers that provide their own installation services. What Is Not Covered by a Solar Panel Warranty?

How long does a solar panel warranty last?

The length of a product warranty varies based on the manufacturer and model. Traditionally, these warranties typically last 10-15 years, although it is becoming more common for premium panels to have 20 and 25 year product warranties. If a panel fails within the warranty period, the manufacturer will typically replace or refund the panel.

What is a solar panel performance warranty?

A solar panel performance warranty guarantees that a home solar panel installation will meet or exceed a baseline of electric power output over the panels' lifetime and warranty period.

Does a solar panel warranty cover labor costs?

Solar panel warranties typically do not reimburse for labor costs associated with installing new equipment or shipping fees for new equipment. When comparing warranties, focus on product warranty terms, power guarantees, labor warranty terms, transferability and bankability, and the availability of an extended warranty.

A solar panel system is a multi-decade investment that is paid off over years through reduced utility bills, and depending on your location, other benefits for sending excess power back into the grid. The less solar power ...
