

# Washington drivers blocking electric car charging stations

How can Washingtonians suggest EV charging locations?

Washingtonians can suggest future charging locations to the state Department of Transportation through the map. Right now, EV drivers encounter chargers in disrepair, a variety of charging standards and speeds, and a variety of required apps and payment methods.

How many EV charging stations are there in Washington State?

There are roughly 3,500 gas stations in Washington state. Through a mix of private enterprise and historic public investment, many thousands more charging stations are coming atop the 4,000 already operating. It won't be long until EV chargers are ubiquitous, and it won't be long until our daily travels cease to choke the air we share.

How much will Washington State invest in EV charging stations?

In addition, the state will invest \$69 million a year to install new chargers statewide with special emphasis on serving Washingtonians in multifamily housing without dedicated parking. Construction of new EV charging stations in Washington state is taking off.

Could a streetside charging network help Washingtonians without off-street parking?

A new bank of charging stations was installed at Lacey City Hall thanks to a state Department of Commerce grant awarded to the City of Lacey. A robust streetside charging network would help Washingtonians without off-street parking, like in urban areas or multifamily housing.

Where are EV charging locations in Washington State?

Chargers are mostly concentrated in the Seattle-Tacoma-Bellevue area. The state is working on an EV mapping tool to identify existing charging locations and strategically site new ones to eliminate "charging deserts." Washingtonians can suggest future charging locations to the state Department of Transportation through the map.

How much does it cost to charge an EV in Washington State?

Brooks gets around just fine, and he says things are getting better fast. There are now more than 4,000 public charging ports in Washington state. The range of new EVs improves every year. Charging an EV at home in Chelan County costs the equivalent of just \$0.30 a gallon.
