

## **We need faster level 2 electric car e charging stations**

Should you upgrade to a Level 2 electric vehicle charger?

Upgrading to a level 2 electric vehicle (EV) charger brings many benefits. It makes charging faster, more efficient, and cheaper. It also makes charging more convenient. Switching from a level 1 to a level 2 charger cuts down charging time. This means you can drive more and wait less.

Which EV charging station should I Choose?

Tip: Start with Level 2 for home use. It balances speed and cost effectively. For EV charging business owners, understanding the nuances between Level 1, Level 2, and Level 3 charging stations is critical to meeting the diverse needs of your clientele.

How long does a Level 2 EV charger take to charge?

Compared to Level 1 charging which can take 2 to 3 full days to charge a vehicle, Level 2 charging only takes 3 to 8 hours, which is relatively more efficient and reliable. Additional electric setup - Because Level 2 EV chargers use a 240-volt plug, they must be installed by certified professionals.

Why is a Level 2 EV charger better than other EV charging levels?

The main reason why Level 2 charger installations exceed other EV charging Levels is that Level 2 chargers can be installed practically everywhere. Level 2 EV charging speeds of 10-60 miles per hour also align perfectly with Americans driving an average of 37 miles daily, according to Department of Transportation statistics.

How much range does a Level 1 EV charger add?

Level 1 chargers add 3 to 5 miles of range per hour. But, Level 2 chargers can add 10 to 20 miles of range per hour. This depends on the EV and the charger. Level 2 chargers are great for EV owners who need to charge quickly. They are perfect for charging at home, work, or in public stations.

How fast does a Level 1 eV charge?

This translates to adding 20-60 miles of range per hour of charging, significantly faster than Level 1's 4 miles per hour. EV Level 2 Charging Time: Depending on your battery size and power, a Level 2 charger can fully charge your EV in 2-8 hours, much faster than Level 1's 11-20 hours.
