

Who owns West Penn Power?

SOURCE FirstEnergy Corp. West Penn Power, a subsidiary of FirstEnergy Corp. (NYSE: FE), has begun work to connect a pair of solar energy projects in Fulton and Franklin counties to the electric grid.

What services does West Penn Energy provide?

West Penn Energy Services, LLC provides full-service, quality pipeline services to the oil and natural gas industry within the Appalachian Basin area of Pennsylvania, Ohio, and West Virginia.

When will West Penn Power & FirstEnergy connect?

West Penn Power expects to complete the connection work for both projects in late 2023, with the two solar farms expected to be in service and delivering clean energy in early 2024. FirstEnergy continues to make investments that support clean energy and improve grid reliability and resiliency.

Where is West Penn Power located?

West Penn Power serves areas throughout the western half of Pennsylvania. It is located in three sections: one in the southwest corner, one along the southern border, and one in the center of the state.

Does West Penn Power supply electricity?

By default, West Penn Power customers receive both their electricity distribution and supply from the utility. This means that West Penn Power does supply electricity to its customers. You still get your bill through West Penn Power, so the only change for you is your electricity rate.

Will West Penn Power expand its McConnellsburg substation?

For the first project, West Penn Power will expand its McConnellsburg substation in Fulton County and add a new terminal at the substation to provide a connection point for a 70-megawatt solar farm that AES is developing in Ayr Township. The second project is a 150-megawatt solar farm in Peters and Saint Thomas Townships in Franklin County.

**Third-Party Ownership:** Third-party ownership models, such as power purchase agreements and solar leases, are allowed for net metered systems. Pennsylvania Code Chapter 75.11 establishes the rules of net metering in Pennsylvania.
