

# Which electric car has the most charging station

Which EV charger has the most EV charging networks?

One can hardly discuss electric vehicle charging without mentioning one of the most prolific of EV makers and its corresponding network: Tesla. Whereas ChargePoint has the largest EV charging network by virtue of numbers, it is actually Tesla that has the most Level 3 chargers.

Which electric vehicle charger companies operate around the world?

Here is our full list of 15 electric vehicle charger companies that operate around the globe: Tesla, with approximately 3,400 Supercharger stations and more than 31,000 EV charging sockets, has one of the largest fast-charging stations networks.

Which electric vehicle charging networks are growing in popularity?

Another electric vehicle charging network that is growing in popularity is Blink, with the company proudly proclaiming that it designs, manufactures, and operates EV charging stations around the world. Besides its own public network, businesses and individuals can also own one of its patented charging stations.

Which country has built the world's largest EV charging network?

China has built the world's largest electric vehicle (EV) charging network with the greatest number of installations, the most extensive services coverage, and the most diverse range of options.

How many EV charging stations are there?

One of the fastest-growing EV networks and charging stations is that of Electrify America, which boasts 3,503 fast chargers, 116 Level 2 chargers, and 806 charging stations with 123 on the horizon as of the time of this writing.

How many electric cars are in a public charger?

Globally, there are around 10 electric cars per public charger. This is heavily weighted by China, which has around 7 per charger. Many countries in Europe have a much higher ratio. The EV-to-charger ratio tends to rise with time; countries need some public infrastructure to get started, but EV sales then outpace a rise in public chargers.

Star Charge operates China's largest charging network with 257,000 electric vehicle charging stations according to the end of 2021 data. The company mediates the transfer ...
