

Does CATL own a battery factory?

CNN has reached out to CATL for further comment. As of last year, CATL operates 13 battery factories around the world, including in China and Germany, according to the filing. The firm has previously announced it was working on a joint venture in Spain with Stellantis, the owner of Fiat and Chrysler, to build a battery plant.

Does CATL manufacture lithium ion batteries?

CATL has more than half of the metal-refining capacity needed for battery manufacturing, including 93% of the manganese and 100% of graphite needed for lithium-ion batteries. CATL has invested in maintaining its position as a global leader in battery manufacturing.

Where are CATL batteries made?

In 2019, the battery giant broke ground in central Germany to build a \$2 billion CATL battery gigafactory for BMW and Volkswagen. The factory covers 57 acres and has the capacity to build batteries for hundreds of thousands of cars annually. CATL began building this assembly facility when it was still a young, 8-year-old company.

When did CATL become a car battery company?

In 2011, Zen decided to get into car batteries and launched CATL. By 2017, CATL had overtaken Panasonic as the world's largest lithium-ion battery producer in terms of sales, managing to lower production costs compared to its Korean and Japanese rivals by increasing the scale of production.

Why is CATL a global leader in battery manufacturing?

CATL has invested in maintaining its position as a global leader in battery manufacturing. Along with building new batteries, the company's recycling unit can recycle 90% of lithium and 99% of cobalt, nickel, and manganese. CATL is also invested in innovation, as it holds more than 4,400 patents.

Does CATL make EV batteries?

CATL doesn't just make batteries, but it also recycles 90% of lithium and nearly 100% of other raw materials like cobalt and manganese. The battery company has a gigafactory in Germany to help BMW and VW build new EVs and meet the European Union's carbon emissions goals.

The company also has plans to become the largest battery manufacturer in Europe with the planned second gigafactory in Hungary. It is expected that 44% of planned battery capacity in Europe will be supplied by ...
