Where is solar power nation located?

Solar Power Nation commenced operations around 2010. The company currently facilitates solar installations in New South Wales, Queensland, Victoria, South Australia and Western Australia. Its head office is in Sydney, with offices also in Perth, Brisbane, Melbourne and Adelaide.

Who is the owner of a solar power plant?

The owner of a solar power plant is the entity that owns the plant once it is in commercial operation. Typically, owners are independent power producers (IPPs) or infrastructure funds, who may have multiple solar power stations as part of a broader renewable or general energy portfolio.

Who owns utility-scale solar power plants?

Traditional energy utilities, community groups, property owners, and project developers own utility-scale solar power plants. Traditional energy utilities also own some solar generating stations, as do community groups and property owners wanting to use the power produced. Some project developers retain ownership of projects they have developed, either for the long term or pending sale to a new owner.
