

# Why is florida not the leader in solar power

Does Florida have solar power?

In Florida, where abundant sunshine is available, solar power has been slow to catch on. Solar power exists in Florida and has been a key tool for some Floridians, particularly the wealthy and environmentally-conscious, in their energy choices.

Who owns the solar panels in Florida?

In Florida, 72% of solar panel installations are owned by a third party--the solar panel company--through leases or agreements that let the solar company profit from the energy generated. Florida is one of five states that specifically prohibit this kind of third-party ownership.

Is it possible to lease rooftop solar in Florida?

Florida is one of the five states that prohibit third-party ownership for rooftop solar. According to the state's logic, people with rooftop solar provide a utility and all utilities must be able to provide power 24 hours a day. Any utility unable to lease and provide power on demand isn't allowed to do so.

Will Florida allow third-party leasing of solar panels?

An amendment in Florida would allow third-party solar panel leasing, but it also includes language that would allow utility companies to charge extra to solar panel consumers.

Should state and local governments be required to install solar panels?

Great! State and local governments should ensure that consumers who do not choose to install solar panels are not required to subsidize the costs of backup power and electric grid access to those who do. (Emphasis added)

Is it possible to lease solar energy?

Nobody ever said that leasing solar energy is easy. Vote no, and you are trusting your state legislature to come up with an amendment that specifically allows leasing solar energy, but has stricter (i.e., more difficult to take advantage of) concessions to the utility industry.

Solar policies in Florida have tended to favor utility-owned large-scale solar over residential and commercial rooftop power generation: Around 86 percent of the state's solar installed in the first half of this year was built by ...

This year will be a defining time for Florida's solar power industry. Eco-conscious Floridians should be aware of several upcoming initiatives that will require their support to ...
