

Wybot robotic pool cleaner with solar power

Is wybot's M1 Ultra a good pool cleaner?

This recent addition to WYBOT's pool-cleaner lineup was originally set as a Kickstarter campaign, and it has achieved over \$220k from the beginning in just two weeks ; that's insane! What's more impressive is that the M1 ULTRA won the MUSE Design Awards (2023 Gold Winner), which already gives me a sign that it's good.

How do I use the wybot smart app?

WYBOT Smart App: This is my favorite part of this product. If you have a smartphone, you can connect your M1 ULTRA to it through Bluetooth or Wi-Fi. Then, you can control everything you need from the app, including cleaning modes, scheduled cleaning sessions, and more.

Can solar power energize a robotic pool cleaner?

The M1 ULTRA is the first concept that uses solar power to energize a robotic pool cleaner. Thanks to the company's "Sunshine and Cloud" philosophy, all you have to do is use the panel to charge the machine and then use the remote-control operation features to clean your pool in the way that best fits your needs.

What is wybot M1 Ultra?

Its most recent product, the WYBOT M1 ULTRA, aims to take the next step in pool cleaning innovation, taking all of the hard work out of your hands and saving you money at the same time! The M1 ULTRA is the first concept that uses solar power to energize a robotic pool cleaner.

Can a wybot M1 Ultra be charged through magnetic charging?

Well, the WYBOT M1 ULTRA can also be charged through magnetic charging during those colder seasons, so rest assured you'll be able to jump into the pool with your family with no issues. Triple Drive Motors: The brushless, triple-drive motors from the M1 ULTRA ensure higher stability and reliability than other cleaners on the market.
